SUBJECT INDEX

Amorphous Solids
Electronic Structure, Non-oxide Glasses 72 (1985) 181
Phase transition, Nucleation 72 (1985) 301
Phonons, Structure 72 (1985) 191
Photoconductivity, Non-oxide Glasses 72 (1985) 199

Borates
Silicates, EXAFS 72 (1985) 211

Chalcogenides
Phase Separation, Optical Properties 72 (1985) 1
Thin Films, Optical Properties 72 (1985) 1

Chemical Durability
Phosphates, Structure 72 (1985) 335

Crystallization
Metallic Glasses, Diffusion 72 (1985) 249
Metallic Glasses, Electronic Conductivity 72 (1985) 267
Metallic Glasses, Expansion 72 (1985) 279

Density
Glass Fibers, Silica 72 (1985) 233

Diffusion
Metallic Glasses, Crystallization 72 (1985) 249

Elastic Properties
Phosphates, Glass Formation 72 (1985) 81

Electron Microscopy
Sol–gel Method, Structure 72 (1985) 139

Electron Spin Resonance
Fluorides, Radiation Effects 72 (1985) 51, 159
Silica, Optical Properties 72 (1985) 175

Electronic Conductivity
Metallic Glasses, Crystallization 72 (1985) 267
Metallic Glasses, Pressure Effects 72 (1985) 73
Polymers, Thin Films 72 (1985) 171

Electronic Structure
Amorphous Solids, Non-oxide Glasses 72 (1985) 181

Expansion
Metallic Glasses, Crystallization 72 (1985) 279

EXAFS
Borates, Silicates 72 (1985) 211

Fluorides
Oxides, Optical Properties 72 (1985) 39
Radiation Effects, Electron Spin Resonance 72 (1985) 51, 159
Radiation Effects, Optical Properties 72 (1985) 221

Glass Fibers
Density, Silica 72 (1985) 233
Raman Spectra, Silica, Refractive Index 72 (1985) 243

Glass Formation
Glass Transition 72 (1985) 65
Phosphates, Elastic Properties 72 (1985) 81
Sol–gel Method, Sintering 72 (1985) 369

Glass Transition
Glass Formation 72 (1985) 65

Infra-red Absorption
Phosphates, Structure 72 (1985) 315

Internal Friction
Metallic Glasses, Relaxation 72 (1985) 287
